4. GENETIC IDENTIFICATION

The Association may at any time require the herd owner to genetically identify certain animals for the purpose of verifying applications and records on file for the registration of Guernseys. However, it will be standard procedure that the Association will require one (1) animal out of every 250 applications for registration to be parentage tested. If the chosen animal cannot be tested, then an alternate one from the same herd will be picked. All breeding males shall be genetically identified before entering service.

5. APPLICATION FOR REGISTRATION

 - i. by a form approved by Canadian Guernsey Association, to be filled in in ink or typewritten, signed by the owner of the animal or authorized representative, at the time of birth.
 - ii. by electronic communication, provided the applicant has signed an electronic registration agreement prior to making application by such means.
 - iii. by any other method of registration as may be approved by the board of directors, as they see fit.
