AGM 2023

Canadian Guernsey and Ontario Guernsey Association held their 2022 Annual General Meeting in person and virtually Friday March 17th at Brantford Ontario. The meeting was called to order at 10:54am with 12 members attending in person and 5 members joined virtually. The business part of the Ontario and Canadian Guernsey meetings were chaired by Ontario President Jocelyn Forster and Canadian President Jim Eby. Annual Reports are on the website – www.guernseycanada.ca

Following the meeting the Board of Directors elected the Canadian Guernsey Association new President Paul MacLeod, Vice President Bruce Fuller and Ontario Guernsey Association President Jocelyn Forster and Vice President Colin Comfort. Congratulations and a special thanks to Past President Jim Eby for his time and commitment to the Association.

Guest speaker Jenny Butcher owner Little Brown Cow Brantford told her story of how she and Wes Kuntz grew their dream from milking a few cows to a full-service grocery store. Cheese curds have become Little Brown Cow's signature offering and they sell hundreds of containers a week. Drop in next time in the Brantford area to try them out!

The meeting was hosted at Holstein Canada Building with hot lunch served, chocolate milk and cheese provided by Jim Eby and we concluded the day with a fun auction with our fabulous auctioneer by Russell Gammon.

What is a Gold Star Breeder?

We at Eby Manor were pleased to once again be the recipient of the Gold Star Breeder award. Each time a herd earns this award it brings you one step closer to achieving the coveted Master Breeder award.

These awards are based on accumulating points based on a combination of individual cows' production and type classification.

The goal of every dairy farm is to maintain a profitable herd that will support their family. A profitable herd requires both adequate production as well as correct conformation to enable the individual cows to produce milk for multiple lactations. The Gold Star Breeder award is designed to recognize herds that maintain the required production levels as well as meet the classification benchmark.

Achieving good milk production as well as high scoring type classification should be the goal of every dairyman, whether they qualify for the Gold Star Breeder award or any other award.

Management styles differ from farm to farm, and earning a Gold Star Breeder does not necessarily mean that your herd is more profitable than others. However, there is a feeling of accomplishment that comes along with receiving the award knowing that your herd has met the criteria required to be presented the Gold Star Breeder and the recognition that your herd has a desirable balance of production and conformation.

- Jim Eby

Find out if you're a Gold Star Breeder by contacting Pat Hill at 1-855-756-8300 ext 210

Gold Star Breeder

2022 AWARD

EBY MANOR LTD

Waterloo, ON

Congratulations on your achievement!

To achieve this honour, a home-bred herd will have at least 15 completed records, with classification score average at least 82.5% and BCA 10 points above the National Herd Average for Butterfat and Protein.

"As soon as I decided to compete, I knew I wanted to use @ebymanorltd dairy. I have always loved their products and I love the people behind them even more. A huge thank you to Grace, Reuben, Jim and the rest of the Eby family for the support in being my milk sponsor!

It makes it so much easier as a competitor when you're using products that you truly love and believe in. For my milk course, I used a 2:1 ratio of their 4.8% whole milk and their 2%. It went SO well with my coffee, it tasted like strawberry shortcake. I wish I could make my milk course for everyone!

For those who have never tasted an A2 guernsey milk, it's so sweet and so creamy, it's absolutely delicious. Their milk is also very gentle on the body and is great for people who are sensitive to dairy! You need to try it!

Thank you thank you thank you Eby Manor!"

– Katie Taylor (Via Instagram post @justanothercoffeegram)

Congratulations to Katie Taylor on her strong showing in the barista competition at the Restaurants Canada Show in Toronto. Katie now qualifies to compete in the Nationals in Calgary.

President's Ramble

Hello Guernsey members,

As your newly elected President, allow me to introduce myself. My name is Paul MacLeod, I farm alongside my family at Darcroft Farms Ltd, a three-time Holstein Master Breeder herd in Oxford county between Embro and Stratford.

I acquired my first Guernsey cow from my neighbor, who by coincidence has the same last name as me, the late Colin MacLeod, even spelled the same way too! When Colin sold his herd in June 2019 I bought his remaining Holsteins and a couple of nice looking Guernseys. That is when I became a member of the Canadian Guernsey Association with the prefix TWISTED CREEK. In between Colin and I lies a little winding stream, hence the prefix.

Now, onto business! We recently held our 118th Annual General Meeting on March 17, 2023. It was announced that we signed another agreement with Holstein Canada, to continue to provide Financial and Administrative Services for another five (5) years. They provide great

service as an administrator to the CGA. Thank you to Linda Markle and Emilie Wallace and anyone involved in helping out!

Lastly, I want to mention the newest project for the CGA- a genomic project, where you'll see more information and details on page 16 The board felt that now is the time to make an investment in genomics in order to advance the breed, grow the population of the genomics pool and increase the reliability on Bull proofs. This breed info can only be good for the future. Information is powerful! In closing, I would like to wish you all a great spring and an even better summer! I look forward to seeing some members throughout the year.

Take care,

- Paul MacLeod

National President

Spring 2023 Breed Improvement

COMMITTEE UPDATE

Greetings Guernsey enthusiasts. This is a reprint of my report from the annual meeting with some updates at the end so you can skip to the bottom for the latest information!

2022 was a busy year for your breed improvement committee. We had a couple meetings as a whole, a few of us were involved in a couple subcommittees and there were a lot of emails back and forth.

We started the year with some committee members being part of the group that had the exciting task of examining our bylaws. We recommended many changes to wording, punctuation and generally modernizing our bylaws to better reflect the age in which we live.

In April we met with National Classification Coordinator Bruno Jubinville at Eby Manor farms where we examined a few cows to make sure our measurements for each classified trait result in the desired outcome. Bruno advised the committee of 2 areas that he felt needed some modifications, udder depth and rear udder height. We agreed and after more research and discussion the committee made the following recommendations which were approved by the board.

Old LS 1 - - 8

New LS 1 - - 8

UD .24 - 6.67

2.4 - 6.6 inches above hock

RUH 11.67 - 7.31

10.8 - 5.2 inches below vulva

During the summer I met with, University of Guelph professor, Eduardo Ribeiro at my farm to inquire about the possibility of doing a research project on the fertility of the Guernsey breed. Unfortunately he felt that do to the small population base any results would be statistically insignificant. It might be a project for a masters student as funding may be an issue as well. He also mentioned the first step would be to look at the genetics and that more genomic tested animals would be desirable.

That brings us to our fall meeting where the board had tasked us with bringing them a proposal to get more Guernseys genomic tested. It took some time but we have sent a proposal to the board and hopefully, if approved, a program will be presented to our membership shortly.

If you remember my report in the Journal I mentioned the possibility of our Grand and Junior Champions from the National Show showing at the Royal in the Supreme Champion class. As it turned out the Supreme committee denied our request preferring to allow entry only to breeds that hosted their National show at the Royal. Undeterred, we have sent a formal letter to the Supreme committee in hopes of being included next year. We shall keep you posted.

Finally there is currently a subcommittee being formed to examine the Guernsey true type model and we will attempt to modernize our model to better reflect today's ideal Guernsey cow.

The board has approved the committee's proposal for genomic testing and has allocated \$10,000 to the project. The Association will credit you \$33 for cows and \$15 for heifers tested from herd that are on classification and milk recording programs. If you use Holstein Canada for testing the association will automatically credit your account but if you use another testing company you will need to send in your bill to the association for reimbursement. Get your samples in before the funds run out!

As for the true type model committee, we are still in the early stages and figuring out if the project makes financial sense for the association.

All the best,

Scott Gordon

Field Representative's Reflections

ROARING BACK AND COMING OF AGE!

This has been an exciting late winter and early spring for the Guernsey breed in Canada!

Wow!

The annual meeting in Brantford, Ontario was so terrific! What a nice turnout live with additional members on line! Thank you to Emilie, Linda and the team at Holstein Canada for being such amazing hosts on March 17th!

What a happy, progressive meeting!

Super excited about the decision to get moving on genotyping Guernseys across the country. Congrats Guernsey Canada Board on a bold move!

This action will help Guernsey maintain a pronounced lead in percentage of the population being A2A2! Over and above that it shows the rest of the industry that Guernsey is serious about genetic improvement and advancing the breed! And the genotyping of scads more Golden Guernseys will increase the accuracy of genomic evaluations in Canada whilst maybe identifying some hidden gems in the breed AND confirming the excellence of some other female lines! Only good can come from this!

Then the sale of a Guernsey calf by London Dairy in the very high profile Calves for a Cause Sale at Canadian Dairy Expo in early April captured the attention of hundreds of dairy farmers.

The December born calf had a rich Maplehurst pedigree with some Dunster breeding on her topside.

The calf has a new home in the Midwest of the USA and sold for one of the top five prices for live animals in the sale at over \$10,000!!!

There was a stunning and motivating tidal wave of interest in the calf prior to and during the sale. Over 1600 people were at the sale with hundreds more on line. What a prime example of exploding interest in the best of the breed and in Guernsey milk!

The sale of this calf begs the question of whether a sale of Guernseys should be organized for later this year or in 2024? Maybe sales would be a better idea!

The breed's veterans and hundreds of 4-H members were deeply saddened by the sudden passing of one of the breed's biggest fans and most ardent social media proponents, Dr. Tim Henshaw as CDX finished. Tim a resident of Minesing, Ontario was raised in the former Guernsey-rich area around King City, north of Toronto. His dad, Charlie Henshaw was involved in managing the famed Kingfield Guernsey herd. Dr. Henshaw was a lifelong friend of the Schwartz family at nearby Tannery Hill farm, home of another iconic Guernsey herd. Over 900 people attended his funeral in mid-April and of course, the word Guernsey was mentioned often.

We continue to receive numerous requests about Guernseys and answer them to the best of our abilities.

Looking forward to the National Guernsey Show at Ancaster, Ontario in September and equally to continued Guernsey improvement and growth of the breed and demand for Guernsey milk products.

For the record Eby Manor full fat milk is an exciting addition to their product line and is spectacularly delicious and great for you!

LET'S GO!

Russell! G (for Guernsey?) Gammon

Russell Gammon

Goals for the Guernsey Breed

- **Increase the number of members** to 75 over the next three years.
- **Increase the number of registrations** to 500 per year over the next three years.
- **Increase national average production** to 375 kgs butterfat and 275 kgs protein by 2026.
- **Increase the number of Guernsey animals available for sale** through expanded use of embryo transfer, IVF, sexed semen, and cattle sales.
- **Continue to support and encourage production of Guernsey dairy products** by assisting producers to access high quality genetics. Continue to market the quality of the Guernsey cow, especially her milk.
- **Increase the number of animals** in the breed genomic tested and classified.
- **Reduce and eventually eliminate** monetary dependency on investment income.

AIMIS

Administrative Message

Hello Guernsey producers!

I hope you are having a fantastic Spring so far. We had quite the summer week back in April, wouldn't you agree?

Back in March, the Canadian Guernsey Association held its 118th Annual General Meeting. We had members join us, almost coast-to-coast: from Manitoba to Nova Scotia, fieldsman Russell Gammon ran a successful auction, with all monies going towards the Association. Guest speaker Jenny Butcher was also present and spoke about her business, Little Brown Cow, just outside of Brantford, Ontario. If you ever get the chance to stop by, the cheese curds are always a hit!

We've done more updates on the website, such as a new Director info sheet and new 4-H and scholarship applications, which you can also find information on in this newsletter.

The next issue of the newsletter is planned for August, so if you have any pictures you'd like to share with your fellow members, please send them my way at GuernseyInfo@holstein.ca, we'd love to share them for you!

I wish everyone a safe and happy summer, along with some great weather!

Until next time,

Emilie Wallace

Registrar's Message

Good morning from the office in Brantford,

It was great to see many of you at our office for the AGM in March this year. I really enjoyed chatting with you and even seeing some of your faces for the first time. Congratulations on a successful day! The cream that I won (bought) at the auction was gone very quickly. Delicious!

As of writing at the end of March, we have so far had 62 registrations and 27 classifications this year to date. There seems to be lots of momentum in the Guernsey breed – lots of new members already this year- so hopefully we will get many more registrations before the end of the year.

On a more bittersweet note, this will be the last note from the registrar written by me. I am planning to leave my position at Holstein Canada as of June 15 to go work on the farm full-time. I will have a hard time leaving behind my day-to-day contacts with you, but I also look forward to being at the farm every day. Thank you for letting me work with you for these last 4 years.

Enjoy your summer! Don't forget to take a break once in a while when things get a little crazy in the fields.

- Janine Eygenraam,

Registrar

You can reach us at 1-855-756-8300

Janine Eygenraam: Ext. 283 or jeigenraam@holstein.ca

Some added news - Jerry Sumbler is retiring May 17th. He has enjoyed his time working with Guernsey producers and we wish him a happy healthy retirement. You can continue to call us at the same number, in your next issue we will introduce your new Registrar.

Supporting Youth

4-H APPLICATIONS

If you or a youth you know is participating in 4-H with Guernsey calves, please let us know.
The form is available on the website <http://www.guernseycanada.ca/>

4-H Awards

The Canadian Guernsey Association is pleased to support the 4-H program by presenting a special award to 4-H members who complete their project using a registered Guernsey calf. Applications are received throughout the year and close as of November 30th of the current year.

Name: _____ Age: _____
 Address: _____

 Postal Code: _____ Phone: _____
 Number of years using a registered Guernsey calf: _____
 Name of Calf: _____ Reg #: _____
 Owner of Calf: _____
 Name of 4-H Club: _____
 Name & Address of Club Leader: _____

I certify that the above member has completed their 4-H calf club project with a registered Guernsey calf.

Signature of Leader _____ Date _____

This form is to be returned upon completion of project to:
 Canadian Guernsey Association
 Box 610 (civic: 20 Corporate Place)
 Brantford ON Canada N3T 5R4

Fax: 519-756-3502 Phone: 1-855-756-8300 Email: Guernseyinfo@holstein.ca

EDUCATION SCHOLARSHIP

Attention: Reminder for students: Application for the scholarship are due on **August 1, 2023**.
Please email Guernseyinfo@holstein.ca for an application or any questions.

CANADIAN GUERNSEY ASSOCIATION SCHOLARSHIP

In memory of Lillian Beckett & John Y McHabb

Name: _____
 Address: _____
 Telephone No: _____
 Age: _____
 University or College: _____
 Program: _____

Eligibility:

1. Must be active or have been active in the promotion of the Guernsey breed.
2. Must be enrolled in a post-secondary university or college.
3. No individual is eligible for a second award, but unsuccessful applicants may re-apply, if eligible.
4. Return the application no later than **August 1** to:
 Canadian Guernsey Association
 Box 610 (civic: 20 Corporate Place)
 Brantford ON Canada N3T 5R4
 Fax: 519-756-3502
 Phone: 1-855-756-8300
 Email: Guernseyinfo@holstein.ca

AWARD

One scholarship of \$500.00 will be awarded to a student enrolled in a college diploma or university degree program. Proof of enrollment must be included with the application. The award could be presented at the National Guernsey Show in September.

As part of your application, please answer the following questions.

Scholarship Questions:

1. Education: Describe the main emphasis of your course of study and your reasons for your enrollment in the program.
2. Farm Experience: Provide a detailed explanation of all duties and responsibilities you assume on your home farm and other farms.
3. 4-H and/or Junior Farmers: Note years of involvement and achievement awards. List total number of 4-H clubs completed and executive positions held. List all offices held and activities you were part of when in Junior Farmers.
4. Explain what 4-H and/or Junior Farmers have done for you in terms of personal growth, attitude, etc.
5. Goals: Provide a short essay on your career goals (need not be agriculture related)

Fax: 519-756-3502 Phone: 1-855-756-8300 Email: Guernseyinfo@holstein.ca

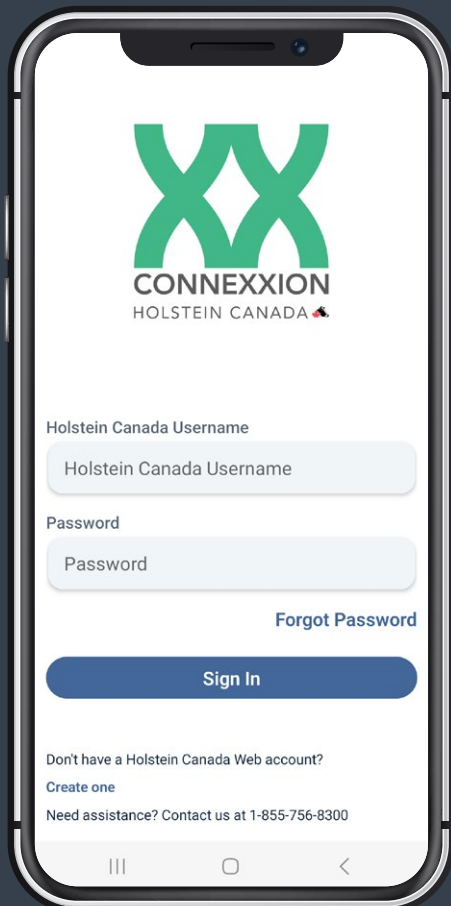

CONNEXION

Holstein Canada Presents

An All Breeds Genomic Testing App

Simplify genomic testing for any breed with ConneXXion

Easily search for animals in your herd and link them to samples

Submit genomic test requests before animals are registered to speed results

Track the progress of your samples from the time you ship them, to receiving results!

Now Available

Check out the App today!

WWW.HOLSTEIN.CA

Genomic Testing in the Guernsey Breed

The Guernsey breed is a relative newcomer in the genomics world compared to other dairy breeds. The small size of the breed nationally, and more limited genomic data pool changes the value proposition for producers who may be interested in genomic testing. Guernsey animals will not benefit from the same increase in reliability of their genetic evaluations as other breeds; however, some unique opportunities exist from your investment in genomic testing.

The Guernsey breed is estimated by Lactanet to have the highest frequency of the A2A2 milk protein genotype of all dairy breeds at around 85%. Many genomic test offerings, including CLARIFIDE at Holstein Canada offer milk protein results as a standard offering. Guernsey breeders may want to focus on A2A2 animals in their herds and as a breed and select against the remaining 15% of the breed that is either A1A2 or A1A1.

Guernsey breeders who choose to genotype their herds will benefit from genetically confirmed parentage. Most all relevant Guernsey sires have been genotyped allowing for an accurate confirmation to reported parentage in animal lineages. Genetically confirmed parentage is a large, and often overlooked part of the value of genomics and the Guernsey breed benefits the same way as other genotyping breeds in this regard. Correct parentage improves animal rankings, sire selection and aids in the control of inbreeding in your herds.

Canadian Guernsey Association Genomic Testing Promo is now Available

- Guernsey breeders can contribute to their breed's advancement by choosing to genotype their herds.
- When combined with phenotypic data collected on farm in the form of animal classification and milk recording, these records will grow the Guernsey reference population and allow for greater gains in reliability through genomics in the future.
- Take advantage of a unique opportunity to genotype at a reduced rate this year to benefit your herd, and your breed!
- If you are Classifying and on Milk Recording, the Association will credit \$33 for each cow and \$15 for each heifer/calves genomic tested.
- When testing through Holstein Canada, credits will be applied to your Holstein account at the end of each month. Tested elsewhere –send in your request with a list of animals tested and / or invoice, we will validate test results and apply credit to HC account.
- Testing through Holstein Canada is easy with their new mobile application, using TSU's or by printing a Genotype Form from Holstein Canada's website; attaching a hair sample and mailing to Holstein Canada.

CANADA VS US PROOF RESULTS

How Similar Are They?

ARTICLE BY: MURILO CARVALHO, HOLSTEIN CANADA EXTENSION & EDUCATION SPECIALIST

In Canada, when referencing genetic evaluations we typically look at LPI to discuss an animal's genetic merit because it is the official national index. South of the border, PTI and NM\$ are the most common among Americans, while other countries have indices that have been built to reflect their own conditions, needs and market. For example, some countries emphasize traits related to fertility because their system uses seasonal calving, while others focus more on health instead of production. Also, each country uses its reference population, the heritability of the traits in their population, and incorporates the correlations among them to calculate the indices.

With the minority of the AI companies (and bulls available) being from Canada, many of them present their proofs with American numbers. For this reason, Canadian breeders are fairly familiar with PTI and NM\$. Still, it is crucial to know the aspects that differ from the domestic proofs and how it affects your breeding decisions. In fact, we often underestimate the differences between the American and Canadian indices, which can heavily impact the genetic gain of your herd.

Related, but not the same

One can argue PTI and NM\$ are highly correlated with the Canadian LPI. Fair point because the indices do have a strong relationship. Even though there is no Pro\$ evaluations for Guernseys, since that index was launched for Holsteins and Jerseys, the LPI has been tailored to mean higher profitability at the farm level.

Both PTI and LPI have a similar approach - a major focus on production, along with functional conformation, health

and fertility traits. Meanwhile, NM\$ is an economic index, meaning it tries to predict the genetic potential of the animals and/or their progeny to generate profit. For that, they consider the national industry, economic and market parameters, which are significantly different between the Canada and the United States. Also, the traits included in these indices and their respective weights vary significantly. The table summarizes some relevant differences that affect how the American and Canadian indices are built.

Industry aspects	Canada	USA
Herd size	~93 cows	~300 cows
% cows on AMS	~25%	~4%
% cows on pasture	Virtually no 100% pasture system	20% entirely on pasture at some point of the year
Current milk price	~\$0.90 CAD/kg	~0.70 CAD/kg
Milk price structure	Defined and similar across the country	Varies by region (20% variations), some follow international prices
SCC limit	400,000 cells/ml	750,000 cells/ml
Dairy areas' land price	\$5,000-80,000/acre	\$3,000-15,000/acre
Location and weather	No warm dairy areas	60% of dairy areas are cooler, 40% are in a warm climate
Feed cost	~\$23 CAD/100 liters of milk	\$18 CAD/100 liters of milk
Quota	\$25-50,000/kg	No quota system

Different countries, similar focus, different goals

With the contrasts among the two countries, you can imagine the realities of the herds within very distinct – even within Canada, we find diversity among management environments. Although the overall goals are similar – more production, for example – the specific objectives change.

Looking South of the border, many Guernsey herds use their milk to process their own cheese, or sell to specific plants that make premium products. That creates a whole different scenario from the one seen in Canada, where the price paid for the milk is determined by the milk board. This variation reflects into Net Merit (NM\$) being a mix of three economic indices: Cheese Merit (CM\$), focused on component production; Fluid Merit (FM\$), focused on volume of milk; or Grazing Merit (GM\$), focused on high health and fertility, and not as much production. Indeed, for a Canadian producer, CM\$ is probably the closest we can get to the Canadian index.

Breaking down the trait differences

Within the indices, the production traits are evaluated very differently. While Canada uses production and milk quality over three lactations, US considers only the first lactation. Also, the US includes crossbreds into their production evaluation, while this doesn't happen in Canada. For functional traits, the methodology is also different – for example Canadian and American fertility indices are not the same; US mastitis resistance considers only first lactation cases, while Canada considers 3 lactations. Finally, the conformation traits also have significant differences that affect the indices, with some traits not evaluated on both sides of the border, while others have different criteria. The table summarizes these.

Trait	Canada	USA
Udder Floor, Body Condition Score	Weighted traits	Research traits (no weight)
Udder Texture, Loin Strength, Heel Depth	Weighted traits	Not evaluated
Strength and width	Evaluates Chest Width and Body Depth – both have intermediate ideals	Evaluates Strength (includes width) and Body Depth – extremely deep and wide are ideals
Udder Depth, Body Depth, Foot Angle	Ideal is intermediate	Ideal is one extreme (shallow, deep, and steep, respectively)
Rib Structure	Dairy Capacity includes rib angle, openness and spring	Dairy Form includes rib angle and openness

What does that mean in practical terms

By now, you can imagine the indices have relevant differences. The animals that do not rank very well for traits that are evaluated differently (or not evaluated) end up falling in the index ranking. To illustrate the differences, the PTI formula directly penalizes stature while emphasizes protein way more than the Canadian index, which also emphasize fat and protein deviations. Looking further, the top5 NM\$ bulls in the US are out of the top5 LPI in Canada. Also, looking at the conformation aspect, the top5 bulls in the US average conformation is below 0, while Mammary system is +2 and foot and Feet and Legs is slightly below 0. The table below summarizes the top5 proven and genomic bulls in Canada, as well as the top5 NM\$ bulls in the US.

Bull group	Fat	Protein	Conformation	Mammary System	Feet and Legs
Top5 LPI Proven	16	5	+4.2	+8	1.2
Top5 LPI Genomic	18	10	+4.2	+5	1.6
Top5 NM\$	21	13	-0.2	+2	-0.4

Take home messages

The different countries across the globe adopt specific indices that reflect the average reality of their producers, their animals, and their breeding goals. Even though most of the indices focus on general goals that are common to any country (production, fertility, longevity...), the animals have very distant rankings depending on the country. This is important to keep in mind when deciding which bulls to use and also when analyzing your own females – for example, a high NM\$ heifer may be far from the top in terms of real profitability here in Canada. Although you are still going to make gains, you could drastically boost the progress by using the evaluation designed for the Country, the cows and the reality in which you farm.

Guernsey News

2023 ADVERTISING SCHEDULE

New for 2023: We are moving towards three issues of Guernsey News and eliminating the Guernsey Journal.

May 2023 Newsletter (submissions due by April 1)
 August 2023 Newsletter (submissions due by July 15)
 December 2023 Newsletter (submissions due by November 15)

We are always looking for advertisement submissions for our Guernsey News! New discounted rates for advertisement frequency in multiple newsletters.

If you could please provide any advertisements in the below format: Wording for art work specs i.e. design specs – CMYK at 300 ppi in PDF format. We encourage you to submit Camera ready / Completed ads to take advantage of an additional 25% discount.

If you need help putting an advertisement together kindly reach out to Emilie Wallace, and we can look into this on a case by case basis for costs to do ad layout.

SIZE	FREQUENCY 1 Member/Non-Member Rate	FREQUENCY 2 Member/Non-Member Rate (Discount of 15% for 2 ads)	FREQUENCY 3 Member/Non-Member Rate (Discount of 25% for 2 ads)
FULL PAGE 8.5" x 11" <i>with 0.25" bleed</i>	\$240.00 / \$420.00 PER ISSUE	\$200.00 / \$360.00 PER ISSUE	\$180.00 / \$315.00 PER ISSUE
1/2 PAGE 8.5" x 5.5" <i>with 0.25" bleed</i>	\$150.00 / \$240.00 PER ISSUE	\$130.00 / \$200.00 PER ISSUE	\$110.00 / \$180.00 PER ISSUE
1/3 PAGE 8.5" x 3.67" <i>with 0.25" bleed</i>	\$120.00 / \$180.00 PER ISSUE	\$105.00 / \$150.00 PER ISSUE	\$90.00 / \$135.00 PER ISSUE
1/4 PAGE 5.5" x 4.25" <i>with 0.25" bleed</i>	\$100.00 / \$150.00 PER ISSUE	\$85.00 / \$130.00 PER ISSUE	\$75.00 / \$110.00 PER ISSUE

Camera-ready Ads: ADDITIONAL 25% discount

Base Change Summary - April 2023

Each year, the genetic base used to express genetic evaluations in Canada is updated in conjunction with the first official release. The definition of each genetic base used is therefore as follows:

Breed(s)	Traits	Genetic Base Definition Used
All	Production	Cows born during a 3-year period centred seven years ago (2015, 2016 or 2017) that have test day records in the Canadian Test Day Model genetic evaluation analysis. The same base group is also used for Pro\$.
Holstein	Conformation	Proven bulls born in the most recent complete 10-year period (2008 to 2017).
Coloured	Conformation	Proven bulls born in the most recent complete 15-year period (2003 to 2017). For Canadienne and Milking Shorthorn breeds, the base period starts with proven bulls born in 1984 and for the Guernsey breed it starts with proven bulls born in 1994.

The table below indicates the amount of base change realized in 2023 compared to 2022 for each trait and breed. For LPI, the following base adjustments reflect the change to the new scale with half the variance compared to previous years.

Base Changes for 2023 Versus 2022

	AY	BS	CN	GU	HO	JE	MS
LPI ¹	0	0	0	0	0	0	0
Milk (kg)	74	60	37	91	111	59	-12
Fat (kg)	3.6	2.8	1.0	3.1	5.1	3.4	0.3
Protein (kg)	3.1	2.4	0.9	2.4	4.5	2.5	0.0
Conformation ³	0.44	0.11	0.12	0.31	0.71	0.14	0.16
Mammary System ³	0.48	0.18	0.10	0.17	0.79	0.18	0.15
Feet & Legs ³	0.28	0.08	0.13	0.19	0.44	0.00	0.13
Dairy Strength ³	0.33	-0.16	0.06	0.27	0.19	0.08	0.20
Rump ³	0.14	0.04	-0.08	0.12	0.07	0.02	0.04
Herd Life ²	0.36	0.07	0.00	0.19	0.70	0.12	-0.08
Somatic Cell Score ²	0.12	0.02	0.07	0.27	0.75	0.22	0.40
Daughter Fertility ²	-0.07	0.11	-0.04	0.09	0.74	0.14	0.06

1 – Base change for LPI is set to zero since it is already reflected by the change in the “Constant” included in the LPI formula.

2 – Traits expressed on scale of Relative Breeding Values (RBV).

3 – The base change for Conformation traits are based on genetic evaluations calculated using daughter classifications and not composite indexes as introduced in April 2021

More than Two Years of National Traceability!

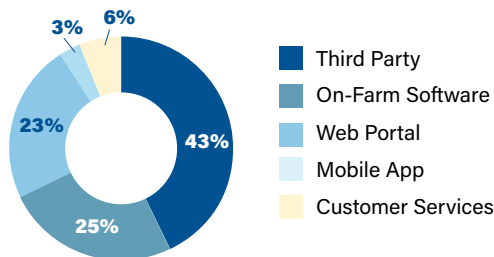

Since the launch of DairyTrace in October 2020, nearly 98% of active dairy farmers outside the province of Quebec* have activated their DairyTrace account and begun reporting their traceability events to the national database for the dairy cattle industry.

Reporting

Reporting is now easier than ever and is on the rise! Even though proAction® traceability event reporting only became mandatory in September 2021, over 2 million events were reported per year in 2021 and 2022 nationally. Each event that is reported creates the timeline of an animal's movement and ensures an efficient traceability program.

2022 Events Reported by Source to SimpliTRACE & DairyTrace

Events such as births, movements, imports/exports and tag retirements can be reported via a variety of reporting options available.

Directly through DairyTrace via:

- online portal
- mobile app
- customer services

Indirectly with the

assistance of an on-farm software system or a third-party data provider.

Dairy Tags - Dual & Single

DairyTrace and proAction® encourage dual tagging for identifying all animals born on dairy farms across Canada. As an allowable exception outside the province of Québec, the white single button RFID tag was introduced by DairyTrace in 2020 as an option for identifying calves born on your farm but are destined for purposes other than dairy production.

Tags are part of an effective traceability system, which better protects and supports industry market access, competitiveness and consumer confidence. Dairy bovine tag numbers can easily be tracked in DairyTrace, which has the potential for value-added opportunities in the future, including traceback. Order your white single button RFID tags for use on your dairy farm, if you have not yet already, as the use of yellow button beef tags on dairy farms will be fully phased out by September 1, 2023.

Customer Services

Our national bilingual customer services teams have been busy helping producers and stakeholders learn about traceability, set up their accounts, report events, order tags, and access their proAction® Validation reports.

Contact customer services for questions:

Support for provinces outside of Quebec:
Phone: 1 866 558-7223
Ordering tags: tags@dairytrace.ca
Traceability questions: info@dairytrace.ca

Support for Quebec:
Phone: 1-866-270-4319
Email: sac@attestra.com

* Quebec has pre-existing provincial regulations that require farmers to report on births, deaths and movement. To respect these regulations, Quebec dairy farmers must continue to report directly to Attestra using SimpliTRACE and dual tagging of all cattle is mandatory.

GUERNSEY HATS

Now available for purchase

HAT A:
AJM 6 PANEL
ENZYME WASHED
Super soft 6 Panel Constructed Full-Fit (Mesh Back) Enzyme Washed Deluxe Chino Twill/Soft Nylon Mesh cap.

HAT B:
AJM FIVE PANEL
BASEBALL CAP
5 Panel Constructed Pro-Round-Five (Mesh Back) baseball cap made from Deluxe Chino Twill / Nylon Mesh. Has Pro-Stitch & a Pre-curved peak.

To purchase, email at guernseyinfo@holstein.ca. We can bill directly to your Holstein Canada Account if desired. Hats are \$20.00 (+ shipping). Please provide address upon request for estimated shipping quote.

**Get your Guernsey Merch
while inventory is still available!**

WORLD GUERNSEY CONFERENCE

The English Guernsey Cattle Society is extending an invitation to Guernsey breeders through the world to visit the United Kingdom.

The Congress will visit Guernsey herds and noted points of interest in England. Not only will top quality Guernsey herds be visited but we will pass through some outstanding scenery and visit major visitor attractions.

We look forward to extending a warm welcome to all participants.

World Guernsey Congress Schedule: 3–17 June 2023

Find out more at <https://www.fieldfarmtours.co.uk/agricultural-tours/1679/world-guernsey-congress-2023/>

Booking Form: <https://www.fieldfarmtours.co.uk/workspace/pdf/wgcf-2023-registration-form-.pdf>

GUERNSEY SUMMER PICNIC

Mark your calendars- The Canadian Guernsey Association will be having a Summer Picnic on **Saturday, July 29th, 2023 at 11 a.m.** The host farm is Mar-Ley Farms located at 230 Glasgow St S, RR 1 Waterloo Ontario.

There will be games, a judging class, a classification demonstration and an auction – all auction items welcomed. It's pot-luck themed, so please bring a lawn chair and your favourite dish! **Please RSVP by June 30th by emailing** GuernseyInfo@holstein.ca **or by calling** **Emilie Wallace at 1-855-756-8300 ext. 290.** We hope to see you there!

ANCASTER GUERNSEY SHOW

Thursday, September 21 | 4 p.m. | Ancaster Fair Grounds

Looking forward to seeing you there at the show or in the stands!
